

A NEW SPORT · BORN IN OLYMPIC CITY USA

Three ways to score. One goal. No dead time.

A continuous-play contact field sport with no downs, no huddles, and a scoring decision the crowd reads with the players — and a proposal to launch it at Ragain Field.

Fusionball takes the territorial battle of football, the continuous possession of rugby and soccer, and the multi-value scoring of basketball, and puts them on one field. Possession flows until it's taken. Every attack carries a live decision: take the points now, or keep going for more.

THREE SCORES. ONE GOAL. ALWAYS LIVE.

6

TOUCHDOWN

Carry or catch the ball in the end zone.

3

TARGET

Throw it through the target mounted in the goal.

1

UPRIGHTS

Throw or kick it through the uprights, any time.

THE GAME

- ◆ 80-minute games, fixed clock, including a 15-minute half
- ◆ 11 players a side, 15-player rosters
- ◆ American-style ball; forward, backward, and lateral passing
- ◆ Turnovers reverse play instantly — no reset
- ◆ Kicks happen in live play, not set pieces
- ◆ Scores are always on the board: a 3 and a 1 beat a touchdown's lead

WHY SPECTATORS STAY

- ◆ Constant possession — no lining up between plays
- ◆ The crowd reads the decision with the players: *take the 1, or go for 6?*
- ◆ Comebacks are always arithmetic away
- ◆ Athletes are hybrids — every player runs, throws, catches, kicks

4

SATURDAYS

The Fusionball Colorado Springs Invitational. Locally formed teams — as many as the Colorado Springs area can field — playing pool games over three weekends and a championship on the fourth. The first public games of a new sport — played, filmed, and launched here. Saturday afternoons into the evening, under the lights. Dates set with Parks for the 2027 season.

What we're asking for at Ragain Field

Martin "Ed" Ragain Field · 6303 Barnes Road · grass pitch, existing football uprights, stadium seating and lights

DATES	Four consecutive Saturdays in the 2027 season, on the dates Parks recommends for turf condition and the soccer calendar. Fewer games per Saturday, weekday evenings, or splitting dates with a second venue are all acceptable.
HOURS	Afternoon and evening games under the lights: setup 1:00 PM · games 3:00–9:00 PM · field cleared by 10:00 PM each day. Every game is a fixed 80 minutes including halftime, so the schedule is predictable to the minute. Games per Saturday scale with the number of teams entered; championship on the final Saturday.
FIELD USE	Play on the existing grass pitch using the existing uprights. Portable soccer goals rolled aside before play and returned after. Temporary, removable field markings only (flat discs and cones by default; paint only with Parks approval).
EQUIPMENT WE BRING	One target hoop per goal, mounted to the existing crossbar with padded clamps. No drilling, no welding, no ground penetration, no permanent modification. Installed and removed each game day. Engineered spec — weight, clamp method, wind load — provided with the application.
SPECTATORS	Ticketed admission at the gate. Attendance expected in the low hundreds per game day, larger for the championship — a small fraction of Ragain's roughly 5,000-seat capacity; no traffic control or overflow parking anticipated. Existing bleachers plus sideline seating. PA for announcing only.
CONCESSIONS	Food trucks or a concession stand each game day; no alcohol. Organizer holds a City sales tax license; each vendor carries its own City Mobile Food Unit License, county health license, and insurance. Vendor list and placement in the site plan; we follow whatever concession or facility-use fee applies to the venue.
PERMIT PATH	City Special Event Permit, citywide application, submitted at least 90 days ahead. We expect Parks to classify a new contact sport as a high-risk activity and have planned accordingly.
SAFETY & INSURANCE	Athletic trainer or EMT on site every game day; trained, certified officials; published rulebook with defined contact rules; signed waivers, all players 18+. Commercial general liability \$1M per occurrence / \$1M aggregate with the City of Colorado Springs named as additional insured, plus participant accident coverage for every athlete.

FIELD IMPACT — WHAT THE TURF WILL ACTUALLY SEE

- ◆ **Load per Saturday:** up to three 80-minute games, about 4 hours of play; 22 players on the field at a time
- ◆ **Wear pattern:** distributed rather than concentrated — scoring attempts come from anywhere on the field, not from one set piece spot; contact adds divots near tackles that soccer does not
- ◆ **Six-day recovery** between game days; no play on saturated turf; rain dates agreed in advance
- ◆ Molded cleats only; portable goals moved and returned by our crew; flat markers instead of paint unless Parks prefers paint
- ◆ **Full soccer width, spread play:** we play the whole pitch, so 22 players spread across 76 yards rather than concentrating in a football-width strip; the sport's rules push players wide and deep, not into a pack
- ◆ **Photo-documented** pre- and post-day walkthroughs with Parks staff; organizer pays for any repair or reseeding
- ◆ We will schedule around Parks' aeration and overseeding calendar

WHO WE ARE

Old Dominion Racing, Colorado Springs, has produced permitted endurance events since 2016 with parks, police, and public-works departments in multiple states. **Fusionball League LLC** sanctions the sport; ODR operates the Invitational.
